SUMMARY

Enterprise IT and infrastructure lead with six years across private and public sector environments. At Stewart Holdings I ran the entire IT function alone for a construction holding company managing \$3B+ across seven subsidiaries: identity, security, endpoints, networking, and vendors. Routine work runs on PowerShell and Python automation, and production tooling, monitoring, and MCP integrations sit on top of daily operations. Strong on the Microsoft 365, Entra, and Intune stack. Bilingual English and Spanish.

TECHNICAL SKILLS

Identity & Security: Microsoft Entra ID, Active Directory, Intune (MDM), Microsoft Purview, Microsoft Defender, Cisco DUO (MFA / SSO), Abnormal Security (email security), Netskope SD-WAN

Infrastructure & Endpoints: Windows, macOS, Linux, Microsoft 365 administration, Cisco Meraki, Veeam (backup / DR), Citrix, Parallels

Automation & Scripting: PowerShell, Bash, Python, SQL

Collaboration & Service Desk: Mitel, RingCentral, Zendesk

Software & AI Tooling: TypeScript, Rust, MCP server development, AI workflow automation (Claude, Codex)

PROFESSIONAL EXPERIENCE

Stewart Holdings Group — Sole IT Lead

Houston, TX · 2023 – 2026

Sole IT and infrastructure function for a construction holding company managing **\$3B+ in active real estate development** across 7 operating subsidiaries (Stewart Builders, Keystone Concrete, Keyscape, Stewart Development, Ludlow & Associates) and 3 offices.

- Owned **identity, security, endpoint management, networking, and vendor relationships** for all seven companies; served as primary technical liaison to executives.
- Migrated legacy infrastructure to modern cloud identity and security on **Microsoft Entra, Intune, and Defender**.
- Built PowerShell and Python automation for user provisioning, license management, and ticket triage across a multi-entity IT function.
- Wrote monitoring scripts to surface visibility gaps across the device fleet.

- Integrated data analytics into accounting and bidding workflows.

David Weekley Homes — IT Support

Houston, TX · 2021 – 2023

Endpoint support and configuration for a national homebuilder operating ~90 offices across roughly 20 U.S. states.

- Provided endpoint support and device configuration across a distributed national footprint.
- Supported **Windows, Microsoft 365, and Zendesk** ticketing for a high-volume user base.

Harris County Public Health — Pandemic Operations Tech Support

Houston, TX · 2020 – 2021

Frontline technology support for COVID-19 vaccination sites operated by Harris County, the third-largest county in the United States.

- Kept check-in, registration, and data ingestion systems running through peak surge conditions.
- Supported high-volume public operations under sustained time pressure.

INDEPENDENT ENGINEERING

Selected work. Full portfolio at github.com/asuramaya.

- **neo**: local workflow forensics for Claude Code, surfacing hidden transcripts, telemetry, and lifecycle events into one labeled SQLite database.
- **chronohorn**: family-agnostic experiment tracking and architecture search behind a 64-tool MCP surface.
- **remix-etherscan-mcp**: smart-contract audit MCP combining Etherscan v2, remixd, compilation, fork simulation, and post-deploy inspection.
- **heinrich**: model forensics through geometry, including residual-stream projections, activation traces, and attention routing.
- **exciton**: OSS Solana engine in Rust, pairing deterministic on-chain scanning with an LLM-driven trading agent (madapesai.com).
- **ndrchst**: Python-based Minecraft server management for Paper/Velocity fleets, with backups, templates, and remote orchestration.
- **decepticons**: reusable predictive primitives for substrates, memory, gating, routing, and readouts; the kernel under chronohorn.

EDUCATION

High school graduate, 2020.
